

DNAGedcom – Manage and Analyze Your DNA Matches

DNAGedcom Client

To install, [download](#) the client interface program to your PC.

- DNAGedcom Client for Windows (Current Version 3.1.3.9)
– [Instructions](#) / [Installer](#)
- DNAGedcom Client for Mac (Current Version 3.1.3.8)
– [Instructions](#) / [Installer](#)

Before installing the DNAGedcom Client you will need to register for a free account with DNAGedcom.com and Genetic.Family. Go to [DNAGedcom.com](https://www.dnagedcom.com) and Register.

Help page: <https://doc.dnagedcom.com/>

Abbreviations

CLM	Collins Leeds Method (cluster matrix of ICW matches)
CMA	Chromosome Matrix Analysis (cluster matrix of ICW matches)
CSV	Comma-Separated Value (text file used in spreadsheet)
cM	Centimorgan (unit of DNA length)
GDAT	Genealogical DNA Analysis Tool (companion software)
HTML	Hypertext Markup Language (web browser page)
GMP	Genome Mate Pro program (now GDAT)
ICW	In Common With (matches sharing a common ancestor)
MRCA	Most Recent Common Ancestor (closest ancestor shared with match)
SNP	Single Nucleotide Polymorphism (DNA mutational change)
TOS	Terms Of Service
