

The following analysis was posted by Paul Lawrence in mid-2005, and is presented here as an aid to TMG users.

=====

For those struggling with Font Sizes I went through and made a list of what is affected by the difference font size settings in Preferences. Hopefully, I've covered them all...

Preferences>Program Options:

Data Entry	Minimum memo font size Maximum memo font size	Affects memo field only, and the expanded memo window
Lists	Minimum font size Maximum font size	Affects all lists which include: Details Window (Personal View only) Children Window Sibling Window Flag Window Master Source List Master Repository List Master Place List Master Event List Master Tag Type List Master Style List Source Type List Source Elements List and in the Tag Entry Window Witness list Citation List
Project Explorer	Font Size	Affects Project Explorer Expanded Pick List Focus Group Preference List
Other	Family View font size Tree View font size	Affects Family View Window Affects Tree View Window

I don't find any setting which affects the Simple Pick List.
